• Auto-advance to next view in exam

 faster operationin high throughput situations

## **AVANSE DR VERSION 4.7.1**

- Easier APR/procedure selection on patient registration: view only procedures or customisable ordering - loose less time on admin
- Search Modality worklists for multiple modality tags: DX, CR, DR ... for complicated departments with multiple devices

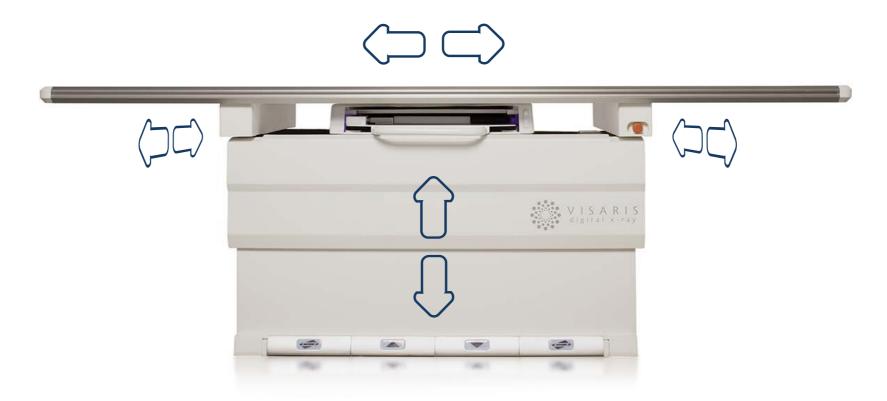

• Clearer PACS sending status display: quickly and efficiently

# **i RAY DETECTOR SUPPORT**

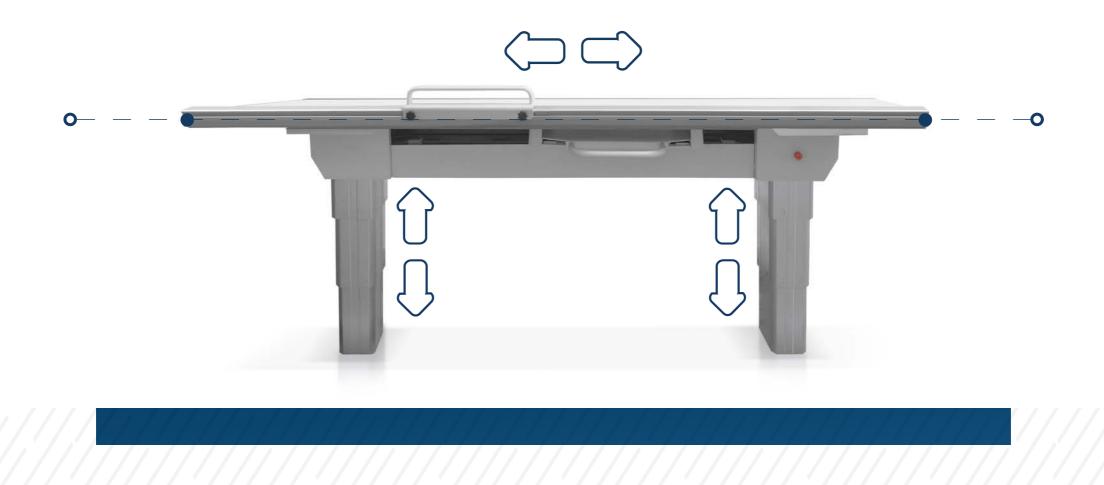

- New detector option with good image quality at competitive price
- Available in 43x43cm fixed and two WiFi sizes (35x43cm and 43x43cm)

# LONGER BUCKY TRAVEL IN BUCKY TABLES

- More than 15% longer bucky travel on 4/6 way tables
- Longer patient coverage on the table: less patient manipulation
- Longer stitching coverage on supine patients for entire spine imaging

# **BUTTONLESS CONTROL OF WALL STAND ELEVATION**

- Intuitive buttonless brake release on wall stand elevation
- No need to hunt for release button: easier and faster positioning
- Ergonomic shape that is easy to grip in all arm elevation positions

## NEW STITCHING PLATFORM

- Smoother shape, fewer corners and easy access brakes on wheels
- Lower step for easier and safer patient access
- Fold up step for spine imaging: no need for patient to climb onto the platform
- Positioning guides for manually positioned stitching

#### **REAL EXPOSURE TECHNIQUE ENTRY** FOR RETRO-FIT SYSTEMS

- Keep track of dose, even on retro-fit systems
- Enter exposure technique that is reported in DICOM
